English

TAMIL

### PROFILE

As a recent graduate with two professional degrees and certification in full-stack development, I bring a solid educational foundation and a comprehensive skill set to the table. I have completed an extensive full-stack ( MERN ) development course, acquiring proficiency in both front-end and back-end technologies. My expertise includes JavaScript, HTML, CSS, React, Node.js, and database management. Currently, I am actively seeking a challenging position in full-stack development to leverage my knowledge and skills, contribute to innovative projects, and grow professionally in a dynamic work environment.

### PROJECTS :-

#### FULLSTACK-VEHICLE CARE

- **Register and Login:** Create an account and log in to access the vehicle care services, ensuring personalized service and secure access to your maintenance history.
- **Select Your Plan:** Choose a maintenance plan that fits your vehicle's needs, offering various levels of service from basic to comprehensive care packages.
- **Fill in All Details:** Provide necessary details about your vehicle, including make, model, and current condition, to tailor the service to your specific requirements.
- **View Your Expense:** Get a detailed breakdown of the costs associated with the selected plan and any additional services before proceeding with payment.
- **Pay Using Stripe:** Complete your transaction securely through Stripe, a trusted payment gateway, ensuring a safe and hassle-free payment process.

#### FRONTEND -WEATHER API

- **JavaScript:** The weather application is fully powered by JavaScript, managing all data fetching and processing.
- **ReactJS Framework:** Built with ReactJS, the application ensures efficient rendering and component-based architecture.
- **Bootstrap and CSS Styling:** The design utilizes Bootstrap and custom CSS, ensuring a responsive and visually appealing layout.
- **Dynamic Interface:** Leveraging ReactJS, the application's interface is dynamically generated and updated in real-time.
- **User-Friendly Design:** Despite its technical complexity, the application remains intuitive and easy for users to navigate.

#### BACKEND -URL\_SHORTNER

- **Node.js Backend:** Developed using Node.js to handle server-side operations efficiently and manage URL shortening tasks.
- **Express.js Framework:** Utilized Express.js for creating RESTful APIs, ensuring smooth handling of URL redirection requests.
- **MongoDB Integration:** Implemented MongoDB for storing original and shortened URLs, allowing quick retrieval and efficient management.
- **Simple Interface:** Designed a user-friendly interface for easy input and retrieval of shortened URLs.
- **Redirection Service:** Implemented reliable redirection to original URLs upon accessing the shortened links.
